EDUCATION

University of Minnesota *Minneapolis, MN*
Bachelor of Science in Computer Science, **GPA: 3.83** Aug. 2022 - May 2026

EXPERIENCE

Software Development Intern May 2024 – Aug. 2024
WEC Energy Group *Milwaukee, WI*
- Spearheaded development of *Application Manager*, an internal tool that facilitates the registration and deletion of company software and provides a live status feed for over **200** programs.
- Utilized **.NET**, **Visual Basic** and **Microsoft SQL Server Management Studio** to engineer scalable, user-friendly solutions that improved the operational efficiency of more than **7,000** employees.
- Refactored and streamlined legacy **SQL** procedures, reducing process times by **30%** on average.
- Leveraged **Azure DevOps** to manage large-scale workflows and uphold efficient version control among my team.

Teaching Assistant Dec. 2023 – Feb. 2024
Microsoft TEALS *Minneapolis, MN*
- Collaboratively lead computer science lessons to a diverse group of students, facilitating a **100%** pass rate.
- Sharpened my own understanding of object-oriented programming and software development principles.
- Fostered an inclusive environment for my students and peers, encouraging growth and constructive conversation.

PROJECTS

Shroom Spotter | *Python, JavaScript, Node.js, FastAPI, Supabase, React, Git* May 2024 – Jul. 2024
- Developed a full-stack **React** application leveraging **PyTorch** and machine learning techniques to identify wild mushrooms with an **80%** accuracy rate.
- Used **Supabase** to maintain and manage a **PostgreSQL** database of user response data.
- Implemented backpropagation and gradient descent algorithms to analyze results and optimize predictive models.
- Developed a highly efficient **RESTful API** with **Node.js**, and **FastAPI**, optimizing data transportation and enhancing system performance.

Gopher Major Planner | *Python, TypeScript, React, Coursedog API, Git* Feb. 2024 – May 2024
- Collaboratively built a **React** app simplifying major declaration by identifying which degrees students are closest to obtaining through their completed coursework.
- Served as **Front End Team Lead**, guiding a team of **12** student developers.
- Seamlessly integrated **Coursedog API** to leverage a database of **24,000** UMN courses and programs.
- Wrote search and sort algorithms to optimally process large-scale non-numeric data.
- Utilized **GitHub** for effective version control.

Package Delivery Simulation | *C++, Docker, Git, UML* Jan. 2024 – May 2024
- Contributed to a **Scrum-based** workflow to develop a simulation model for package delivery drones in the Twin Cities.
- Optimized travel paths across a graph-based coordinate plane using **A*** and **Dijkstra's** algorithms, decreasing initial routing times by over **40%**.
- Crafted detailed **UML** diagrams and EARS requirements documents, enhancing clarity in system specifications and reducing development cycle time by **25%** through improved team communication and understanding.
- Containerized the project using **Docker**.

SKILLS

Languages: Python, Java, JavaScript, Visual Basic, C, C++, SQL, OCaml, R, TypeScript, HTML, CSS, XML, XAML
Frameworks / Libraries: React, Node.js, .NET, PyTorch, Flask, FastAPI
Tools: Docker, Git, Azure DevOps, MongoDB, SQL Server Management Studio, SQLAlchemy, Jira, Visual Studio

OTHER

Social Coding: Lead a network of programmers in developing software that had a positive impact on our community.

UMN Centennial Scholars: Immersed myself into a scholarship program full of students who share my goals for innovation, achievement and diversity in the professional and academic world.
